DETAILED ACTION

1. This Office Action is responsive to Applicant's Amendment filed on 02/18/05. Claims 1-11 are currently pending.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1, 4, 5, 7, 9 and 10 are rejected under 35 U.S.C. 102(b) as being anticipated by Nishiyama (US 6,353,787).

Regarding claims 1 and 7, Nishiyama teaches a control apparatus/method for a vehicle comprising an engine 53, an automatic transmission 52, a brake control system (i.e., solenoid valves 12, 13) that electrically controls a braking force of a wheel brake (25-28), and a controller (100) that causes the brake control system to control the braking force of the wheel brake such that a predetermined deceleration is established (see Fig. 6, step S16) upon a coast downshifting of the automatic transmission during running of the vehicle in a coast state where a throttle valve of the engine is substantially fully closed (see Fig. 6, step S11).

Regarding claims 4 and 9, the controller serves to control the braking force of the wheel brake so as to establish a predetennined target deceleration when the wheel brake is operated through a braking operation of a vehicle operator (col. 5, lines 7-38).

Art Unit: 3681

Regarding claims 5 and 10, the controller serves to increase the deceleration (see Fig. 6, step S19) by increasing the braking force of the wheel brake upon the coast downshifting in response to a downshifting command (see Fig. 6, step S15) from a vehicle operator.

Allowable Subject Matter

4. Claims 2, 3, 6, 8 and 11 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Communication

5. Submission of your response by facsimile transmission is encouraged. The fax phone numbers for the organization where this application or proceeding is assigned are (703) 872-9326 for regular communications and (703) 872-9327 for After Final communications. Recognizing the fact that reducing cycle time in the processing and examination of patent applications will effectively increase a patent's term, it is to your benefit to submit responses by facsimile transmission whenever permissible. Such submission will place the response directly in our examining group's hands and will eliminate Post Office processing and delivery time as well as the PTO's mail room processing and delivery time. For a complete list of correspondence not permitted by facsimile transmission, see M.P.E.P. 502.01. In general, most responses and/or amendments not requiring a fee, as well as those requiring a fee but charging such fee to a deposit account, can be submitted by facsimile transmission. Responses requiring a fee which applicant is paying by check should not be submitting by facsimile transmission separately from the check. Responses submitted by facsimile transmission should include a Certificate of Transmission (M.P.E.P. 512). The following is an example of the format the certification might take:

I hereby certify that this correspondence is being facsimile transmitted to
the Patent and Trademark Office on _____

(Date)

Typed or printed name of person signing this certificate:

(Signature)

Art Unit: 3681

If your response is submitted by facsimile transmission, you are hereby reminded that the original should be retained as evidence of authenticity (37 CFR 1.4 and M.P.E.P. 502.02). Please do not separately mail the original or another copy unless required by the Patent and Trademark Office. Submission of the original response or a follow-up copy of the response after your response has been transmitted by facsimile will only cause further unnecessary delays in the processing of your application; duplicate responses where fees are charged to a deposit account may result in those fees being charged twice.

Any inquiry concerning this communication or earlier communication from the examiner should be directed to Examiner Ho whose telephone number is (703) 305-0738 (or 571-272-7091 after April 2005). The examiner can normally be reached on Monday-Friday from 7:30 A.M. to 5:00 P.M. Eastern Standard Time. If attempts to reach the examiner by phone are unsuccessful, the examiner's supervisor, Mr. Charles Marmor, can be reached at (703) 308-0830 (or 571-272-7095 after April 2005).
